Great Dwight. Can we connect on Monday? It would be helpful to get your perspective before my Tuesday mtg with the Philly CAFO team. I am free anytime between 11-3 or 4-6. What works for you? K

Hi Kelly,

Yes I remember you and I would appreciate a "candid" discussion about the farm visits.

I am available different times. Today may be a problem, but if you are working next week I am sure we could find a time. I will be in Frederick all day Monday (301-694-9290 ext. 129) and in Annapolis the rest of the week (410-841-5877). I may stop by a cover crop meeting briefly on 2/11 in the AM and I have a general staff meeting on 2/12 in the afternoon, but otherwise my schedule is pretty good next week, so far. Just let me know.

Thanks,

Dwight

Hi Dwight,

You and I met in September on that fabulous tour you put together for Shawn Garvin and others in western MD.

Last week, I was at the MD NRCS State Technical Committee meeting and during a break received some confidential feedback on how our recent assessments of dairy operations in Washington County went. It's my understanding that there were some "areas needing improvement".

I'd like a chance to talk with you about your impressions of what worked well and what needs improvement. It's my opinion that these types of assessments should be constructive, informative, respectful, and collaborative. I'd appreciate the chance to talk to you off-line to get your candid feedback so that I can work with our EPA field team to improve on this. I had a good discussion already with Elmer and Hans and would appreciate getting your feedback as well. Is there a good time for us to talk?
